

Globalinternet Billing

Globalinternet Internet offers flexible billing arrangements to assure you have visibility and control of all costs for your internet services. Billing options include currency, as well as a choice of full or local consolidation.

Billing

Invoices that meet your needs.

Globalinternet offers a high degree of flexibility in the set-up of your billing. Invoices can be presented based on your detailed requirements. Our **standard offer** is centralized billing where we present you with a single invoice in the currency of your choice. Additional options allow you to **break down the bill into countries or regions** to meet your business accounting structure and requirements.

As detailed as you want it & reliability built in.

Invoices specify all service details, address details, and charges. We also provide the option to include PO numbers, reference numbers or other custom-defined specifications, enabling you to have full understanding and confidence in accuracy. To accommodate your filing preferences, invoices are available in PDF, XLS or XML format.

Payment terms

When sourcing from multiple ISPs, you will be faced with multiple currencies, payment terms and invoicing dates. With Globalinternet, invoicing goes on the 1st day of the month. Standard payment term is 30 days. Options for extended payment terms up to 90 days are available for a surcharge per 15 days over 30.

Currency

Globalinternet will invoice the internet access services in locally used currency (e.g. services in Australia will be offered in AUD, in Japan in JPY, etc.). Globalinternet will then convert these into the currency of your choice, e.g. USD/EUR. This conversion will be done each month using actual f/x rates at the moment of invoicing. Globalinternet offers the option to fix these f/x rates for

the contract term.

Taxes

Our pricing proposals include any applicable taxes or VAT. Globalinternet strives to deliver cost effective solutions to its customers and seeks to avoid unfavorable tax situations.

Flexibility

Globalinternet has flexible billing options giving customers the most suitable solution for their needs. These options include:

- **Netherlands to Global invoice:** Globalinternet can invoice customers from our legal entity in the Netherlands to most countries around the world, including the USA, without the requirement for VAT or other sales taxes. In most cases this is the optimal and preferred solution of our customers.
- **Netherlands to Local invoice:** Globalinternet can consolidate all Services within a specific country/region into one invoice, and invoice from the Netherlands to land in that specific country. Again, without any VAT or sales taxes normally applicable. This option is available for an additional charge per batch of 10 invoices.
- Globalinternet also has a number of other legal entities that can offer Local billing.

Let's Talk.

At Globalinternet, we want to make sure you succeed in your network transformation projects. Let's get in touch and explore how we can make this happen.
